Passionate and vibrant Software Engineer, eager to delve into the tech world with enthusiasm and commitment. While my hands-on experience is currently growing, I'm excited to develop and demonstrate my skills, contribute to innovative projects and achieve my career goals.

EXPERIENCE

2024

Marvel Comics Quiz

Developed an Android quiz app in Kotlin that uses the Marvel Comics API to fetch and display superhero details for the creation of the quiz. Designed an intuitive user interface with XML, allowing users to test their knowledge.

2023

Battleship Game

Created a web-based Battleship game using HTML, CSS, and JavaScript. Implemented a login system with PHP and utilized SQL databases to store user credentials and game states. The project enhanced my skills in both frontend and backend development.

2023

Management System

Designed and implemented a management system for a local municipality. Utilized Java and MySQL for backend development, with the Oracle SQL Developer client for database management. The graphical user interface was implemented using Java Swing.

EDUCATION

September 2019 - Present

Information and Electronical Engineering (Integrated MSc), International Hellenic University.

- Coursework includes Software Engineering, Data Structures, and Database Management.
- Developed hands-on experience with programming languages such as Java and JavaScript.
- Participated in projects focusing on both frontend and backend development.

SOFT SKILLS

- Communication
- Teamwork and Collaboration
- Problem-solving
- Adaptability and Flexibility

LANGUAGES

- Greek (Native)
- English (B2 Level)
